

Hewlett Packard Docket No.: 200314191-1

PATENT

*Amendments to the Claims*

Please amend the claims in accordance with the following listing.

1. (Currently amended) A computer system ~~having a local or remote low-voltage power button,~~  
comprising:  
a main unit comprising an enclosure and circuitry for sensing activity in a low-voltage power button;  
and  
a first socket or plug accessible from the exterior of the enclosure and electrically coupled to the  
~~circuitry for sensing activity in a low-voltage power button;~~  
wherein the first socket or plug is adapted to removably mate with a corresponding socket or plug  
of either [a] the low-voltage power button or a low-voltage power button extender assembly.
2. (Original) The computer system of claim 1:  
further comprising the low-voltage power button;  
wherein the low-voltage power button comprises a switch integrated in fixed relationship with and  
electrically coupled to a second socket or plug, the second socket or plug adapted to  
removably mate with the first socket or plug.
3. (Original) The computer system of claim 1:  
further comprising the low-voltage power button extender assembly;  
wherein the low-voltage power button extender assembly comprises a switch electrically coupled  
to a second socket or plug by a flexible cable, the second socket or plug adapted to  
removably mate with the first socket or plug.
4. (Original) The computer system of claim 1:  
wherein the first socket or plug is located on a front surface of the enclosure.

Hewlett Packard Docket No.: 200314191-1

PATENT

5. (Currently amended) The computer system of claim 2:  
further comprising a light operable to indicate the a current power state of the computer system;  
wherein the light is located on a housing of the switch.
6. (Currently amended) The computer system of claim 2:  
further comprising a light operable to indicate the a current power state of the computer system;  
wherein the light is integrated within the switch.
7. (Original) The computer system of claim 5:  
wherein the light comprises a light-emitting diode.
8. (Original) The computer system of claim 6:  
wherein the light comprises a light-emitting diode.
9. (Currently amended) The computer system of claim 3:  
further comprising a light operable to indicate the a current power state of the computer system;  
wherein the light is located on a housing of the switch.
10. (Currently amended) The computer system of claim 3:  
further comprising a light operable to indicate the a current power state of the computer system;  
wherein the light is integrated within the switch.
11. (Original) The computer system of claim 9:  
wherein the light comprises a light-emitting diode.
12. (Original) The computer system of claim 10:  
wherein the light comprises a light-emitting diode.
